AMBULANCE STRETCHER

+Reliable +Responsible +Reasonable

Overview

The Mobile transporter is made of high strength aluminum. It has sturdy X-frame undercarriage, which is easily raised by second EMT during loading. Dual ratchet bar adjustment mechanism is simple to operate and permits height adjustment from 38cm to 100cm. The ambulance stretcher head section can be folded down. Adjustable backrest angle from 0 to 75 degree allows patient to be in a comfortable position, leg angel can be adjusted in 0 to 35 degree freely. Only one or two person raise and slide the stretcher on to the ambulance; The stretcher can be locked up after being aboard through the chute; Safety U-bar and hook holds the Mobile Transporter at the rear of the ambulance during unloading as undercarriage is lowered to the ground. It is mainly used for ambulances, hospitals and emergency centers transferring the patient. Mattress fabric and color also include safety belts models all can be customized. The castor size: φ150mm wide rubber castors;
